

# Rebasing (Lab) | Coursera

---

 [coursera.org/learn/git-distributed-development/supplement/QbsKN/rebasing-lab](https://coursera.org/learn/git-distributed-development/supplement/QbsKN/rebasing-lab)

## Exercise

---

- After you have produced a development branch, make some changes to the master branch and recommit.
- Do **git log** on the **devel** branch to show the history of commits.
- Rebase the development branch, using **git rebase**, off the modified **master** branch.
- Once more, do **git log** on the **devel** branch to show the history of commits, and note the difference.

## Solution

---

[lab\\_rebase.sh](#)
